### Environmental Policy

It is the policy of Kent Stainless – Solids Technology to minimise their impact on the environment so far as is reasonably practicable. To this end the company operates a formally documented system to manage the environmental impacts with its activities.

The company is committed to complying in full with all applicable EU and National Environmental legal requirements, with any regulatory authority guidance available and with international best practice. It recognises its environmental responsibilities to staff, clients and the public.

Kent Stainless Solids Technology is committed to the continual improvement of its environmental performance through the :

- Implementation of this policy
- Measurement of environmental performance on an ongoing basis and using this information to regularly review policy, objectives, targets, and resource allocation.
- Encouragement of staff to develop methods that promote environmental protection and minimise environmental effects.
- Encouragement of clients and suppliers to pursue environmental best practice and apply environmentally favourable solutions.
- Provision of education and training to employees, to help them include environmental considerations in all aspects of their work and promote the use of natural resources and minimise, where possible, the use of utilities and production of waste.

Kent Stainless–Solids Technology is dedicated to pollution prevention through the ongoing identification and control of those significant environmental impacts associated with its activities.

These include:

- Setting and achieving environmental objectives and targets that ensure continual improvement in our Environmental Management System
- Setting up and the implementing a programme for waste prevention and reduction and for the collection , segregation , re-use , recycling , storage ,and safe disposal of all wastes arising from our operations
- Effluent discharge monitoring
- Noise control
- Maximise the efficient use of natural resources including energy and water and of other materials.

Kent Stainless – Solids Technology is aware that these objectives will enhance the economic sustainability of the company.

To ensure that the above objectives are met, the Managing Director and all senior Management and Supervisory staff are committed to playing an active role in the implementation of the Environmental Policy and undertake to review and revise it in the light of experience and developments.

Staff is reminded of the Kent Stainless / Solids Technology Quality, Safety and Environmental Management System requires the full commitment of everyone if the above objectives are to be met.
